

Urethane Grade Reducers

Product Numbers:

860-1 Fast (gallon)

0860-1 Fast Low VOC (gallon)

870-1 Medium (gallon)

0870-1 Medium Low VOC (gallon)

885-1 Slow (gallon)

0885-1 Slow Low VOC (gallon)

895-1 Very Slow (gallon)

These reducers are top of the line and may be used in **ANY** paint system which calls for a polyurethane or acrylic urethane reducer. The Very Slow Reducer will dramatically help in the 95+ degree weather for many clears.

Polar Accelerator

Product Number:

900-4 (quart)

Polar Accelerator may be used in **ANY** urethane or polyurethane clear to speed up the dry time. Will not cause dieback or cause the clear to buff hard. May also be used in **ANY** 2K type urethane primer. This product will decrease pot life significantly in any product. 2k primer pot life should be watched closely when using.

Mixing:

Add 1-4 oz per mixed quart of clear or 2K type urethane primer.
